

Pivot3 to exhibit on the Milestone booth at Security 2011

Pivot3 is pleased to announce they will join Milestone on their booth at Security 2011. Milestone Systems the worldwide industry leader in open platform IP video management software, will demonstrate Pivot3 SATC an innovative storage centric approach where server applications share storage hardware resources to reduce overall power and cooling. Since NVR servers generally drive 50% of power and cooling requirements, the benefits of eliminating physical servers are immediate.

Whether the application is a small county jail looking to store 30 days of video using 2 servers or a large airport with 1200 cameras and 20 servers, the Pivot3 savings from replacing physical servers with virtual servers are immediate and long-term.

Milestone will be located on booth J4. Come see a demo at Security 2011

About Pivot3

Pivot3 is the first and only vendor to provide failover-protected virtual machines inside an IP SAN, eliminating the cost, power and rack space of physical servers, as well as dedicated failover hardware. The result is a radical new cost point for high-capacity installations and an integrated approach to high-availability protection for both ISV applications and SAN storage

Pivot3 offers an alternative to separate physical storage and server stacks that must be managed, supported and scaled independently. The Pivot3 storage and compute STAC integrates virtual servers into a high-performance scale-out SAN to consolidate infrastructure, simplify management, and reduce cost.

About Milestone

Founded in 1998, Milestone Systems is the worldwide industry leader in open platform IP video management software, according to IMS Research six years in a row. Milestone XProtect® products have been installed in thousands of customer installations, sold through authorized and certified partners in more than 100 countries. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-of-breed solutions to 'video enable' organizations – managing risks, protecting people and assets, optimizing processes, and reducing costs

Visit our booth J4 at Security 2011 Exhibition, the must-attend trade show for security professionals in Asia Pacific, held August 24 – 26, at the Sydney Convention & Exhibition Centre.
